

Lightweight. Low Profile. Enhanced Engineering.

At last... a low profile cushion that provides positioning support and premium decubitus ulcer protection.

The **NEW** Xact® LP2 allows low seat to floor height for active users and moderate to high-risk clients. Its unique construction floats the user in a pool of Akton® polymer, cushioning critical pressure points for long lasting comfort and support. The innovative cover minimizes high-risk shear and prevents forward migration.

Dual-fabric construction minimizes shear.

Orientation window system prevents improper cover placement.

CUSHION COVER:

- Unique cover construction prevents sacral sitting and minimizes shear in back
- Breathable Spacer Fabric
- Anti-skid bottom
- Secured placement with hook and loop attachments to cane posts
- Personalization label attached
- High strength webbed front handle for easy carrying
- Machine washable- line dry

CUSHION:

- Supports pelvic alignment and optimizes client positioning
- Sacral reservoir reduces the reaction force of high-risk areas
- 2" height allows easy leg propulsion
- Engineered surface geometry provides off-loading to high-risk areas and is accommodating to individual seating preferences
- Highly resilient base with back wedges promotes stable pelvic positioning, supports and cushions trochanters and decreases pressure at the ischial tuberosities
- Akton® polymer pebble surface for low-shear comfort
- Protective incontinence resistant internal cover
- Leg channel provides comfort and adductor positioning support
- Weight Capacity 300 lbs.

Size Range: 16 x 16 - 20 x 20 **Weight:** 18 x 18 5.0 lbs. **CAN Price:** \$695 **2 year warranty**

- Lightweight, strong foam foundation
- Slow recovery comfort foam that provides proper envelopment, yet recovers quickly
- Viscofoam layer offers initial soft pillow comfort
- Akton® polymer top layer offers low shear comfort, temperature/humidity control and constant protection from pressure sores
- Integrated polymer/foam sacral reservoir immerses high-risk areas
