

# TILT & RECLINE REHAB SHOWER COMMUNE

**EZee Life®**

## MODEL: 170

Traditionally, shower/commode were predominantly constructed from steel or stainless steel, each with its inherent drawbacks—steel being susceptible to rust and stainless steel being both expensive and heavy. In contrast, Ezee Life™ commodes are meticulously fashioned from high-quality aluminum, offering rust resistance, a lighter weight compared to steel, and a more cost-effective alternative to stainless steel.

These Aluminum Shower/commode chairs facilitate seamless client movement, enabling care providers to handle heavier individuals effortlessly. The distinctive design and incorporation of tilt/recline prioritize safety, comfort, and optimal positioning. The ergonomic headrest is adjustable to accommodate the diverse needs of any client. Whether utilizing a sit-to-stand lift, sling lift, or client pivot transfer, this commode/shower chair seamlessly accommodates transfers. The majority of mechanical lifts easily fit under the frame, ensuring secure transfers that can be executed forward-facing or by lifting the arms for side transfers.

Ezee Life commodes boast the softest seat, backrest, and armrests in the market. This not only guarantees client comfort but also provides sustained support during extended periods of sitting. The tactile texture is gentle to the touch, delivering a soothing experience while maintaining a plush and comfortable seat.

SPECIFICATIONS	
Frame Material	Aluminum
Weight	46.5 lbs (21.1 kgs)
