

# ELECTRIC SHOWER COMMUNE

↑ **EZee Life™**

## Anterior Tilt, Posterior Tilt & Elevate Electronically all in one Commode

### Stand assist function

Standing transfers provide positive health benefits for patients both physically and mentally. Komodo assists the facility in maintaining best practice in helping patients with limited or declining weight bearing and ambulatory function maintain what abilities they have by assisting in standing and sitting with reduced weight dependence on caregivers.

### Shower assist function

The Komodo seat tilts backwards 30 degrees allowing the carer to wash and rinse the user in a position that is comfortable and accessible.

### Safer for a single carer

Tilting backwards increases the patient's stability and improves safety when cared for by a lone attendant.

### Built for user comfort

The custom made soft PU seat and back provides comfort and support for the user. A lap belt is provided for user security whilst tilted or in motion.

### Adjustable support settings

Adjustable footrests and headrest provide support and comfort for the feet and head while tilted posteriorly while transporting or showering. The footrests can also be fitted with leg straps for extra support.

### Controlled via bluetooth handset

The handset has pre-programmable buttons to achieve standard repeatable positioning for an individual user.

### Features:
