## Brake Operation

The brakes on the CH1045 transport chair can be operated using the feet or hands by the caregiver.

The hand brakes are similar to a rollator or bicycle brake and are operated by squeezing the brake lever to engage the brake.

The foot brake is a looped bar between the wheels that operates both brakes at the same time and can be pushed down to engage or lifted to disengage by the caregiver using their toe.

**Note:** The brakes will not hold securely if the tires are worn or damaged.

## Seat Belt

The CH1045 transport chair comes equipped with a seat belt for the safety of the rider. It is important that it be used any time the user is being transported in the chair to prevent injury from falls out of the seat. Side release seat belts are released by squeezing the two sides of the buckle.

## Pre-Use Checks

- Ensure brakes are functioning properly.
- Ensure nuts and bolts are secure, and the frame is not wobbly.
- Ensure the cushion is not damaged.
- Ensure the tires are undamaged.
- Ensure the frame is not bent or broken.
- Check the front casters and forks for proper condition.
- Do not use if anything seems unsafe or damaged.

## Warnings

- Ensure the push hand grips are not loose before using the transport chair. If loose or worn, replace.
- To avoid tipping, DO NOT attempt to reach objects if you have to move forward in the seat.
- To avoid tipping, DO NOT attempt to reach objects if you have to pick them up from the floor by reaching down between your knees.
- To avoid tipping, DO NOT lean over the top of the back upholstery to reach objects behind you, this may cause the transport chair to tip over.
- To avoid tipping, DO NOT shift your weight or sitting position toward the direction you are reaching.
- DO NOT use an escalator to move a transport chair between floors. Serious bodily injury may occur.
- DO NOT sit or transfer into the transport chair unless it is fully open.
- DO NOT climb, go up or down ramps or traverse slopes greater than 8 degrees.
- Travel up and down slopes and inclines. DO NOT travel across inclines.
- Use caution on slippery surfaces.
- DO NOT over tighten hardware attaching to the frame.
- This could cause damage to the frame tubing or strip the threads.
- DO NOT stand on foot plates.
- DO NOT Stand on seat.
- DO NOT overload this transport chair. The weight capacity is 220 pounds including the user and any things they may be carrying.

**Limited Warranty:**

EZee Life® products carry a one-year warranty against manufacturing defects, faulty materials and workmanship only.

Any alterations, misuse, abuse, or accidental damage voids this warranty. EZee Life® reserves the right to replace or repair any part that has become defective.

The warranty does not extend to consequential costs resulting from the fault or defect of the product: freight and travel costs, loss of earnings, or other expenses that one may incur.

Warranty is valid for the original purchaser only and the original receipt must be presented before any warranty options are considered. Please also be prepared to provide the date of purchase and serial number.
